COMPUTATIONAL FLUID AND PARTICLE DYNAMICS IN THE HUMAN RESPIRATORY SYSTEM

Springer. Hardcover. Condition: New. 500 pages. Traditional research methodologies in the human respiratory system have always been challenging due to their invasive nature. Recent advances in medical imaging and computational fluid dynamics (CFD) have accelerated this research. This book compiles and details recent advances in the modelling of the respiratory system for researchers, engineers, scientists, and health practitioners. It breaks down the complexities of this field and provides both students and scientists with an introduction and starting point to the...
