Ecological compatibility of Bt cotton

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Ecological compatibility of Bt cotton | GM crops or Bt cotton is an important component of IPM but, there are still certain question which are unanswered specifically regarding the ecological impacts of genetically engineered (GE) crops on non-target organisms including natural enemies that are important for pest regulation and thus of economic value. The green lacewing, Chrysoperla carnea most important biological control organism. Being an important predator, it is also routinely tested...
