Fundamentals of Serology

By Saiduldin, Tleuberdy

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | For the first time, the Serology is discussing from different aspects as an independent science. Up to now, it was allocated to the methodological attribute of human and veterinary medicine as one of the diagnostic methods. Therefore, the limited editions of serology provided only reference function. Theoretical and sometimes educational materials on serology were scattered through the extensive literature on other adjacent sections of Immunology. The book provides a systematic presentation of the material contained theoretical and practical (methodological) information. For the first time the methodological issues of development and testing of new serological tests was outlined. Methods for assessing the diagnostic value of serological test were described with specific references. Such efforts have not been taking in our country and abroad. Serology techniques used in human and veterinary medicine are very similar. This kind of publication would be beneficial to the field of healthcare, as well. The book is designed for veterinarians, veterinary students, researchers, physicians and biologists. Refs.: 194 titles; Tables:19; Graphics: 35. | Format: Paperback | Language/Sprache: english | 264 pp.

This book can be well worth a go through, and a lot better than other. It is written in simple words and phrases and not confusing. It has been printed in an exceptionally simple way in fact it is merely right after I finished reading through this pdf by which basically changed me, modified the way I think.
