Do you use Excel for simple lists, but get lost when it comes to actually doing something useful with all that data, like functions? Revolutionize the way you use the information in your life! Head First Excel helps you move from a spreadsheet dabbler into a savvy user in just a short time. Whether you're completely new to Excel, or an experienced user looking to make the program work better for you, this book will help you incorporate Excel into every aspect of your workflow, from a scratch pad for data-based brainstorming, to exploratory analysis with PivotTables, optimizing outcomes with Goal Seek, and presenting your conclusions with sophisticated data visualizations. Organize and present information clearly in a spreadsheet. Make calculations across a number of worksheets. Change your point of view with sorting, zooming, and filtering. Manipulate numerical and data to extract and use the data you need. Leverage Excel as a grid-based layout program. Get the most out of writing the right formulas for the right functionality. Nest formulas for more complex operations. Create sophisticated data visualizations with charts and graphs. Use Goal Seek to optimize possible outcomes based on different assumptions.
