paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 407 Publisher: China Building Industry Press Pub. Date :2008-06. This book has been revised according to the latest technological developments in engineering colleges nationwide. city gas project Professional trial materials (third edition). The book is 17 chapters. including gas combustion theory. and civil gas appliance burner design. gas-fired furnace in the industry and the rational use of energy-saving methods. thermal calculation and calculation and automatic adjustment of air power. technology. operational management and security content. This book may also be used in gas. natural gas. liquefied petroleum gas and biogas energy utilization of the design. operation and management personnel research and reference. Contents: Chapter gas combustion gas heat value calculation section Section III combustion air required for complete combustion products is calculated in the fourth quarter run-time co content flue gas and gas-fired combustion excess air coefficient V temperature and enthalpy of combustion gas temperature map Chapter chemical reaction kinetics Section III II chain reaction gas fire gas ignition Chapter IV gas mixing combustion air flow in the stationary section Section III free jet flow parallel to the intersection V turbulent swirling jet flow IV Chapter gas diffusion flame burning flame propagation section II the theoretical basis of method to the determination of the first flame propagation speed three factors that affect the flame propagation speed flame propagation speed of the fourth quarter of the gas mixture calculated turbulent flame propagation V Section VI Chapter concentration limit flame burning gas diffusion method of Section II part of the premixed combustion Section fully premixed combustion burner combustion process to strengthen the fourth quarter and Four Satisfaction guaranteed, or money back.
