Brand New Book ***** Print on Demand *****.The sensitivity of information is the cost arising from information getting into the wrong hands. Hackers often steal or destroy private or confidential data simply because it is visible. What if we make this confidential information hidden? There is an illusion that compliance equals security which has led both individuals and organizations to excessively spend on compliance at the detriment of security Steganography attempts to solve this dilemma. One of the goals of steganography is to hide messages in other messages in a way that does not allow the enemy to detect there is a secret message present.
