

Resistant breeding of two species of flower

By Yan, Ma

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The method and process of resistance breeding of two species of flower were introduced in the book. The distant hybridization was used for lodging-resistant breeding of *Platycodon Grandiflorus* and the lodging-resistant offspring were obtained. The results show that the lodging-resistant offspring could be the phenomena of apomixes which was induced by pollen. The Si-ion implantation mutation breeding was used for cold-resistant breeding of *Oenothera speciosa* and the cold-resistant offspring were obtained that can overwinter in Beijing. The results show that the cold-resistant character can be steadily inherited. | Format: Paperback | Language/Sprache: english | 60 pp.

Reviews

This written publication is wonderful. It really is loaded with knowledge and wisdom You will not really feel monotony at at any time of your time (that's what catalogues are for relating to if you ask me).

-- **Desmond Becker**

Absolutely essential go through publication. I am quite late in start reading this one, but better then never. You will not feel monotony at at any time of the time (that's what catalogues are for regarding if you ask me).
