The Committee has already seen the impact these threats are having on the nation's security and its economy as losses to consumers, businesses, and the government from cyber attacks, penetrations, and disruptions already total billions of dollars. Beyond direct monetary losses, the continuing efforts of foreign actors to steal intellectual property will have far reaching impacts on the innovation upon which a robust economy and strong military relies. The Committee has seen widespread theft through cyberspace increasingly evolve into disruptive and destructive attacks. Our nation is growing more vulnerable to cyber threats. Every aspect of society is growing more dependent on computers which are all linked to networks, opening this country up to many known vulnerabilities and many yet to be discovered.
